**Responsible Environmental Stewardship . . .
it's in Our Nature at Bemis!**

Bemis uses environmentally friendly colorants and water-based paints, a co-injection molding process using regrind waste in the cores of its products saving more than 4 million pounds of post-industrial wood shavings a month, and all Bemis toilet seats are packaged in recycled and recyclable corrugate.

**DuraGuard®
ANTIMICROBIAL**

Look for the DuraGuard Logo displayed on point-of-purchase material and packaging. DuraGuard is an antimicrobial agent molded into the seat that continues to migrate to the surface during the lifetime of the seat and inhibits the growth of bacteria that causes mold, mildew, stains and odors* -- an important aid to maintaining a protective, sanitary cleaning program.

- Not a substitute for regular cleaning. Clean seats thoroughly with mild soap and water. DuraGuard does not protect users against bacteria, viruses or other disease organisms.
